Subject: Microsoft Settlement

I am writing to express my opinion that the proposed settlement is a fair and efficient means to ensure the public's interests are protected in future. It addresses the concerns of the original action, and I feel too many of Microsoft's competitors are really just trying to urge the DOJ to do as much damage to Microsoft competitively as possible, in order to bolster their own interests. The losers of a harsher settlement would be the consumer, and ultimately businesses all over the world. Please by all means monitor Microsoft's accounting and business practices/plans to make sure they are not taking unfair advantage, but also please ensure that the often very innovative work of a great company does not suffer in the process.

Regards,
Adam Jenkins
